TRYBECA

Stemming from a revolutionary new approach that combines the study of lighting shapes, materials, and options, TRYBECA is a family of recessed ceiling mounted luminaires with an elegant and minimalist design. TRYBECA luminaires perform excellently and feature exclusive technical details. The product family is composed of three basic shapes (square, rectangular, and round) in four sizes, each of which are designed within the same family of proportions, so the luminaires integrate harmoniously with one another and within their surroundings. Each product is available with trim or as a trimless fixture, and includes three different spacers to provide recessed, flush or drop mounting options. The TRYBECA family’s unique flexibility and simplicity mean it can complement and be installed in a wide range of architectural applications – residential, hospitality, commercial and retail – to provide diffuse, efficient lighting, while adding a distinctive touch to the setting through clean geometric shapes.

For cut out sizes and plenum requirements please visit www.reggianiusa.com.

The trimless version comes with a perforated flange for easy installation and correct application of plaster.

The self-flanged trim version is placed over a cut-out in the sheet rock tile ceiling, and sits against the ceiling using the innovative KlikFix retainer device.

Trim and trimless versions are available in white. For other finishes, please consult factory.

TRIMLESS

TRIM

The special diffuser is made from high quality polymers, enabling excellent performance.

The built-in reflector is made from high performance metallized polymers, and is designed to maximize luminous downlight emission.
